### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

2.1 In claim 4, line 5, after "phosphate," add --and--

2.2 In claim 9, line 2, replace "0.5 to 10" with --0.5 - 10--

### **STATEMENT OF REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

The most pertinent prior art known to the Examiner is listed on the attached forms PTO-892 and 1449. As shown by Armand et al. and Chiang et al., the close prior arts of record, various methods of synthesizing a  $\text{LiFeMPO}_4$  compound are well-known in the electrical conductive material art. Furthermore, the newly cited prior art of Lawrence et al. and R Lawrence disclose the feature of iron-dextran nanoparticles. However, none of the prior art of record including Armand et al. and Chiang et al. provides sufficient suggestion or motivation to use the iron-dextran nanoparticles taught by Lawrence et al. and R Lawrence as a precursor ingredient in the synthesis of  $\text{LiFeMPO}_4$  as required in the present claims since the iron-dextran compounds of Lawrence et al. and R Lawrence are employed to treat iron deficiency in patients in the medical fields. Furthermore, the method of making the claimed iron-dextran compounds

is complex and requires specific steps such as raising and lowering the pH of a the solution containing specific molar amounts of the iron and dextran ingredients while heating and cooling at a precise temperature range and neutralizing the solution thus the resulting properties and product would not be inherent to the mere mixing of an iron and polysaccharide components of the prior arts. Accordingly, the claimed invention, as a whole, would not have been obvious to one of ordinary skill in the electro-conductive material art. None of the prior art of record teaches, discloses or suggests a synthesis with the iron dextran ingredient as a precursor in the manner as those recited the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tri V. Nguyen whose telephone number is (571) 272-6965. The examiner can normally be reached on M-F 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
